

PAL[®] Infiltration System

MICROAIRE[®]
For Surgery. For Life.[™]

PAL® Infiltration System

The PAL® Infiltration Pump integrates with the PAL® System to activate the peristaltic pump from the PAL-650 Handpiece. Custom electronic controls ensure consistent flow at low speeds and a cooling fan prevents overheating of the motor from heavy use. PAL® Infiltration Tubing eliminates obstructions with a large-bore design and smooth connections.

PAL® Infiltration Pump
INF-PUMP

Pump Type	Peristaltic
Maximum Flow Rate	1,150 mL/min
Output Torque	175 oz-in
